EXPERIENCIA

Inoquom, Monterrey: Desarrollador Web.

I spent 6 months as an intern developing web projects for American and Mexican companies, this involved the analysis, design and construction of the websites, all based on the requirements obtained in meetings with clients and stakeholders.

OoMovil, Guadalajara: React Developer

Currently I have 5 months working as a react developer remotely, developing web and mobile applications with a team of engineers, we implement agile methodologies in projects.

FORMACIÓN

Instituto Tecnológico de Sonora, Obregón, Sonora: Ingeniería en software.

PROYECTOS

Quinta Fabiana: React js

I developed a web application for clients in southern Mexico, the page is about the Quinta Fabiana hotel. Different types of services and components were implemented, working with agile methodologies.

Link: <https://quintafabiana.com/>

FGJ Kiosko: Web

I developed a "kiosko" web application, the client was the Edomex government, they needed an application to integrate it into a kiosk so that people could make citizen complaints.

APTITUDES

I am a positive, cordial, enthusiastic, dedicated person and always wanting to learn more.

LOGROS

In a short time I have learned to develop both mobile and web apps and it is something that I thought would be impossible, but I realized that every day something new is learned

Technology

- HTML, CSS
- JavaScript
- Bootstrap, react js, react native
- VueJS, JQuery
- NodeJS, java, php, C#
- MySQL, SQL Server
- Kotlin
- Linux, IIS

Languages

English: 70%

Agricam: *React Native*

I developed a mobile application on agriculture, it has login services, job application, product sales, product information, etc.

SmartConta: *React Native*

I developed a mobile application on accounting, the objective of the application is to carry out accounting and advice, sale of memberships, etc.

Solutek: *React Native*

We developed an application to carry out the sales processes of a company called Solutek. Solutek is a company from Colombia, they had the need for the application to have a chat (rocket.chat) like WhatsApp to have contact with their customers.

Kyosei: *React Native*

The client needed a mobile application to compare products from different stores, to find the best precious.

Kyosei: *Node JS – Web Scraping*

I developed the algorithm to perform web scraping in different super markets, implementing node js and a database, the objective was to obtain all the products (name, price, image) and insert it into the database, to use it in the mobile application.
